

WORLD FIRST DETECTOR which saves lives

**DETEX, the first detector on the world
autonomous fire smoke extractor.**

More than just a fire detector,
Detex saves lives.

DETEX

**80% of deaths are caused
by the smoke in the fire.**

- 1 fire home every 2 minutes
- Double the number 1990
- 300 deaths each year / 3000 serious injuries
- 80% of deaths caused by suffocation
- The 2nd cause of accidental deaths in children less than 5 years
- A room needs only 6 minutes to ignite!
- Average response time of fire services: 18 minutes
- 75% of fires occur at night

Fight against toxic fumes

DETEX, the world's first autonomous detector and smoke extractor Ductless

- Sucks the fire smoke to prevent poisoning
- Absorb carbon dioxide and filters to the outside air to 31% more breathable.
- Reduce carbon monoxide by 6%.
- Reduce room temperature by 30%.
- Increase visibility.
- When the power failure occurs, it operates autonomously for at least 30 minutes, due to internal battery.
- Smoke alarms integrated with European standard NF - EN 14604.
- Extraction capacity 192 m³ / hour.
- Limit the permanent damage caused by soot, avoiding major damage to works of art, for example.
- For complete safety, install one Detex per 25m².
- Patented worldwide.

Prevent the human tragedies.

Install a Detex in both public and private buildings,
